PROFESSIONAL SUMMARY

Senior Backend Engineer with 7+ years of experience designing and building high-throughput backend systems for trading and investment platforms in the FinTech industry. Expert in Golang-based microservices, financial APIs, and data-intensive architectures serving 500K+ API calls daily. Proven track record of improving system performance, reducing deployment times, and leading technical decisions from architecture through production delivery.

WORK EXPERIENCE

Senior Software Engineer

March 2020 – Present

Robowealth Co., Ltd.

- Designed and developed Open APIs for 3 trading/investment platforms (Finvest, Odini, FinPlus), serving 500K+ daily API requests across mutual fund products.
- Architected 15+ Golang-based microservices with well-defined API contracts, data models, and service boundaries, reducing inter-service latency by 40%.
- Designed Elasticsearch schemas for financial data search, improving query response times from 2s to under 200ms for complex fund lookups.
- Optimized PostgreSQL database schemas and indexing strategies, handling 10M+ financial transaction records with sub-second query performance.
- Implemented and managed API gateway (APISIX/Traefik) with rate limiting, authentication, and traffic routing policies, handling 500K+ daily requests with zero downtime during deployments.
- Conducted load testing with k6, identifying and resolving bottlenecks to achieve 99.9% uptime under 3x peak traffic loads.
- Led technical design discussions and sprint planning, mentoring 3 junior engineers and establishing team coding standards.

Software Developer

July 2018 – February 2020

Workmotion Creative

- Developed backend APIs and services supporting high-traffic campaign websites for major cinema clients, handling 100K+ concurrent users during launch events.
- Built RESTful APIs with PHP/Laravel powering 5+ campaign microsites with real-time user engagement features.
- Provided technical guidance and API integration support to 4 frontend developers, accelerating delivery timelines by 25%.

Research & Development Intern

August 2017 – December 2017

Spoon Laboratories Co., Ltd.

- Analyzed user access data across 10K+ daily active users and generated actionable system usage reports for stakeholders.
- Developed internal web service APIs to improve cross-team data accessibility, reducing manual reporting effort by 60%.

TECHNICAL SKILLS

Languages: Golang, Scala, TypeScript, JavaScript, PHP, Python

Backend & API: REST, gRPC, GraphQL, Microservices, Clean Architecture

Databases: PostgreSQL, MySQL, Elasticsearch, MongoDB, Redis, InfluxDB, Oracle

DevOps & Infrastructure: Docker, Kubernetes, Helm, GCP, OpenShift, Terraform

CI/CD & Tools: GitLab CI/CD, Jenkins, ArgoCD, k6, Traefik, APISIX

Observability: Grafana, Prometheus, Jaeger, ELK Stack

EDUCATION

Bachelor of Engineering, Software Engineering

2014 – 2018

Prince of Songkla University, College of Computing
