SUMMARY

Senior Software Engineer with 7+ years of experience designing and building scalable backend systems for trading and investment platforms.

Specialized in Golang-based microservices, financial APIs, and data-intensive systems. Strong experience in Elasticsearch, relational and NoSQL databases, CI/CD automation, and load testing. Proven ability to design systems from architecture to production in FinTech environments.

WORK EXPERIENCE

Software Engineer — Robowealth Co., Ltd Mar 2020 - Present

- Designed, developed, and maintained Open APIs for trading and investment platforms serving mutual fund products (Finvest, Odini, FinPlus).
- Architected Golang-based microservices including API contracts, data models, and service boundaries.
- Designed Elasticsearch and relational database schemas for financial data, ensuring query performance and scalability.
- Implemented CI/CD pipelines using GitLab CI to automate testing and deployment.
- Conducted load testing with k6 to validate system performance under peak traffic.
- Collaborated in sprint planning, technical design discussions, and task breakdowns.

Software Developer — Workmotion Creative Jul 2018 - Feb 2020

Built and developed APIs for website

- Developed backend APIs and services supporting high-traffic campaign websites for major cinema clients.
- Provided technical guidance and API integration support to team members.

Research and Development — Spoon Laboratories Co., Ltd. Aug 2017 - Dec 2017

- Analyzed user access data and generated system usage reports.
- Developed internal web service APIs to improve data accessibility.

EDUCATION

Prince Of Songkla University 2014 - 2018

Bachelor of Software Engineering, College of Computing

TECHNICAL SKILLS

Programming Languages:

- Golang, Scala, JavaScript, PHP

Backend & API:

- REST, gRPC, GraphQL
- Microservices, Clean Architecture

Databases & Storage:

- PostgreSQL, MySQL, Elasticsearch, MongoDB, Redis, InfluxDB, Oracle

DevOps & Infrastructure

- Docker, Kubernetes, Helm
- GitLab CI/CD, Jenkins, ArgoCD
- GCP, OpenShift
- k6 Load Testing, Traefik, APISIX
